Information concerning his proficiency and deportment is communicated to the parent or guardian, at least when requested.

LIBRARIES.

The Libraries of the College and the Literary Societies contain about thirty-five thousand volumes. The *College Library* is accessible to all the students, according to rules established by the Library Committee, and is open in term time for the delivery of books, on Monday, Tuesday, Thursday, and Friday of each week, from quarter-past one to two o'clock P. M. The *Libraries of the two Literary Societies* are accessible to the members of the Societies according to regulations established by themselves, and are open for the delivery of books on Wednesday, from half-past two to quarter-past three o'clock P. M., and on Saturday, from half-past one to two o'clock P. M.

APPARATUS FOR MATHEMATICAL AND PHYSICAL SCIENCE.

The LAWRENCE OBSERVATORY, consisting of a transit room, and a tower with a revolving dome, is furnished with instruments for accurate astronomical observations. The pier in the centre of the tower sustains a refracting telescope, mounted equatorially, having a focal length of nine feet, and an aperture of seven and one-fourth inches. The telescope was manufactured by Alvan Clark, A. M., of Cambridgeport. The transit room contains a transit circle, clock, and chronograph, for meridian observations. The circle was graduated by Gambey, of Paris.

The Observatory also contains an altitude and azimuth instrument, by Gambey, a theodolite, a leveling instrument, and other articles—all of the latest and best construction, for surveying and engineering.

The collection of *apparatus for experiments in Natural Philosophy* is extensive, and well adapted for a course of experimental illustrations. It occupies a room in the second story of the WALKER HALL, where ample accommodations are furnished for its arrangement and use.

The *Chemical Laboratory and Lecture Room* occupy the first story of the WILLISTON HALL. These rooms are furnished with apparatus for an extensive course of chemical experiments.

CABINETS OF NATURAL HISTORY.

The specimens illustrating Natural History and Human Antiquities, are deposited in the three edifices known as the Woods Cabinet, the Appleton Cabinet, and the Walker Hall.

THE WOODS CABINET, named in honor of Hon. Josiah B. Woods, of Enfield, Mass., consists of two stories. The upper one contains the *Shepard collection* of meteorites, and his geological collection (almost exclusively of fossils) amounting to at least 10,000 specimens. The lower room contains the *general geological collection* of the college, together with the State collections of Massachusetts, Connecticut and Vermont, which, together, amount to 12,000 specimens. An adjoining room called the *Nineveh Gallery*, built by Enos Dickinson, Esq., late of Amherst, contains about 200 specimens obtained by Dr. Henry Lobdell from the ruins of ancient Nineveh and Babylon. It exhibits sculptured slabs from the palace walls of Sardanapalus at Nimroud, as well as several hundred antique coins, seals, and cylinders, from the same cities.

In the APPLETON CABINET, named from the late Hon. Samuel Appleton, of Boston, are the *Hitchcock Ichnological Collection*, the *Gilbert Museum of Indian Relics*, and the *Adams Zoölogical Collection*.

In the unique *Ichnological Collection*, named after the late President Hitchcock, are to be found about 1,400 specimens, containing at least 20,000 tracks of animals in stone, together with plaster and clay casts of tracks of living and fossil animals. The *Museum of Indian Relics*, receives its name from the late Hon. George H. Gilbert, of Ware, Mass., by whose liberality it was mainly established. It comprises about 3,500 specimens of the stone implements of the extinct Indian race, and principally those who lived in the Connecticut Valley. The *Zoölogical Collection* was principally gathered and arranged by the late Professor Charles B. Adams. It comprises prepared specimens of animals and their habitations, and dried plants, representing all the great groups of the animal and vegetable kingdoms. In the department of shells, it is particularly extensive and valuable. A collection of comparative anatomy has been commenced and is incorporated with this collection.

THE WALKER HALL is a new granite building, named in honor of Dr. William J. Walker, its principal donor. The third story contains the Mineralogical Collection of Professor Shepard, consisting of more than 10,000 specimens, also his extensive collection of shells and his herbarium.

The collections, as arranged in all these cabinets, contain more than 100,000 specimens of the animal, mineral, and vegetable kingdoms.

The Cabinets are open to the public each week day, from ten to eleven o'clock in the morning, and from three to four o'clock in the afternoon, when the Custodian will be in attendance.

AIDS TO CLASSICAL STUDY.

Through the liberality of certain friends of the College, the Classical Recitation Rooms have been provided with various works of art, adapted to facilitate instruction, and to increase the interest of the students in classical study.

PHYSICAL CULTURE.

The BARRETT GYMNASIUM, named in honor of the late Dr. Benjamin Barrett, of Northampton, is a granite building, with bowling alleys, and the gymnastic apparatus essential to the health, recreation, and proper development of students. It is open during the day-time to the members of the College for voluntary exercise, and at an appointed hour each class is required to be present and engage in exercise under the direction of the Professor of this Department. The required exercises consist almost entirely of the light gymnastics, the movements of which are guided and timed by music, while the heavy and more difficult gymnastic work is entirely at the option of the student. No effort is required of any student which cannot be safely and profitably undertaken by any person who is sound in body and mind.

The Professor in this department is an educated physician, and as far as possible is expected to be acquainted with the physical condition of each student in town during term-time, and all students are permitted to consult him without charge. This department has been in successful operation for the past ten years, and its good effects have surpassed the most sanguine expectations of its projectors and friends.

EXPENSES.

The following are the principal necessary expenses, exclusive of vacations :

General Term Bill, \$25.00 per Term,	\$75.00	\$75.00
Room Rent from \$6.00 to \$8.00 per Term,	18.00	24.00
Fuel and Lights, from \$12.00 to \$18.00,	12.00	18.00
Board from \$3.50 per week to \$6.00 making per year of <i>thirty-eight</i> weeks,	135.00	228.00

The expenses for Room Rent, Fuel and Lights, are estimated on the supposition that two students occupy the same room. For a few choice rooms a higher rent is required.

In case of admission to an advanced standing, \$5.00 per term for the previous terms is required, unless such standing shall have been attained in another college. This charge is sometimes for special reasons, particularly in case of indigent students, remitted by the Prudential Committee.

There are some expenses which result from taxes voluntarily imposed by the classes or societies. These and expenses for furniture, stationery, etc., will vary according to circumstances and the character and habits of the student.

PAYMENTS.

The amount of each term bill must be paid in advance. A bond, with satisfactory surety for the payment of all the College bills must be given by each student to the Treasurer, at the commencement of the term when he enters.

SCHOOL TEACHING.

Students are allowed to teach school each year, twelve weeks, including the nearest vacation, if their pecuniary circumstances absolutely require it.

SCHOLARSHIPS.

The College has a fund of sixty-five thousand dollars, the income of which is appropriated to aid young men who are preparing for the Christian Ministry, and need assistance. Meritorious students of this class can receive each a scholarship of *sixty* dollars annually, which will be credited to them on their term bills. The same class of students usually obtain from the American Education Society not less than *one hundred* dollars annually.
